Aggregating Actual Cost to CCG or National Level

Aggregating Actual Cost to CCG or National Level

If you would like to get the aggregated figure for Actual Cost for your CCG use this formula:
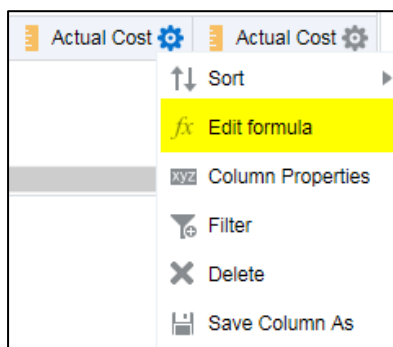

AGGREGATE("Reporting Fields"."Actual Cost" AT "England Prescribing Organisations"."Prescribing Organisation"."Commissioner / Provider Level")

**If you would like to get the aggregated figure for Actual Cost to a National level use this formula:**

AGGREGATE("Reporting Fields"."Actual Cost" AT "England Prescribing Organisations"."Prescribing Organisation"."Country Level")

If you would like to include this data in your analysis you first need to include an additional Actual Cost Column in you analysis, and follow the below steps:

1.   Hover over the Cog Icon on the column and select the Edit formula option

2.   Delete the current Formula

3.   Copy the formula from this document and paste into the Column Formula pane:

Column Formula

AGGREGATE("Reporting Fields"."Actual Cost" AT "England Prescribing Organisations"."Prescribing Organisation"."Country Level")

4.   Give the column an appropriate name by selecting the 'Custom Heading' box and editing the Column Heading
