
APPLIANCES (APPROVED LIST OF APPLIANCES - NOTES)

APPROVED LIST OF APPLIANCES
See Part II, Clause 8A (page 9)

The price listed in respect of an appliance specified in the following list is the basic price (see Part II, Clause 8) on which payment will be calculated pursuant to Part I, Clause 5B in respect of the dispensing of appliances.

NOTES

1. **Definition** - The appliances that may be supplied against orders on Forms FP10 are listed below and must conform with the specifications shown. See Part 1, Clause 2 (page 4). These specifications include published official standards ie BP, BPC or relevant British, European or International Standards or the Drug Tariff Technical Specification. It should be emphasized that any appliance must conform with the entry in this part of the Tariff as well as the official standard or technical specification quoted therein. Other dressings and appliances which may be necessary will normally be provided through the Hospital Services.
2. **Sealed Packets** - These are those which are "tamper-evident" - sealed with an easily detachable device that prevents removal of the contents without the seal being broken. Additionally in the case of sterile products: once a sealed package has been opened it should not be possible to re-seal it easily. Where an appliance, other than a bandage, required by the Tariff to be supplied in a sealed packet is ordered of a quantity or weight not listed in the Tariff, the quantity ordered should be made up as nearly as possible with the smallest numbers of sealed packets available for the purpose. Where the quantity ordered is less than the smallest quantity/weight, supply the smallest pack. The quantity of material in each packet supplied should be recorded on the prescription form.
3. **Quality** - Any medical device placed on the market in the UK has to be CE marked by the manufacturer in accordance with the safety, quality and performance requirements laid down in the EC Medical Devices Directive 93/42/EC and the Medical Devices Regulations 2002 (as amended) which transposes the Directive in to UK law. Manufacturers are required to obtain certification from a third party conformity assessment organisation known as a notified body for all but the lowest risk devices. Notified bodies have been designated as competent to undertake this function by the regulatory authority in the registering member state. In the UK this is the Medicines and Healthcare products Regulatory Agency (MHRA). There are a number of conformity assessment routes that the manufacturers can adopt to demonstrate conformity with the requirements of the Directive but the majority use a quality system approach. More details of the CE marking process can be obtained from the MHRA, 151 Buckingham Palace Road, Victoria, London. SW1W 9SZ or from their website <http://www.mhra.gov.uk/Howweregulate/Devices/index.htm>.
4. **Weights** - All weights specified in the Tariff in respect of appliances are exclusive of wrappings and packing material.
5. **Invoice price** - This is the price chargeable for the appliance to the contractor by the manufacturer, wholesaler or supplier.
6. **Technical Specifications** - Numbered Technical Specifications for the items in Part IXA/B/C were published separately in 1981 in loose leaf volume and a revised list was published in 1983. The Specifications will not be reprinted annually but individual specifications will be introduced, amended and reprinted, or withdrawn, as necessary. A list of Technical Specifications is given on page 269. CE marked Devices have shown that they meet the essential requirements of the Medical Devices Regulations 2002 and there is no further need for them to demonstrate compliance with other specifications, such as those referred to above.
7. **Nurse Prescribing** - See Part XVIIB for details of Nurse Prescribing.

INCONTINENCE APPLIANCES

INCONTINENCE APPLIANCES

1. Prescribers and suppliers should note that products not included in the list are not prescribable (See Part 1 Clause 2). Attention is drawn particularly to the information on the average life-in-use of each type of product which, together with the pack size, should enable prescribers to calculate their patients' requirements with reasonable accuracy.
2. Only basic information on each product has been provided and prescribers may on occasions wish to seek further information about certain products eg when assessing a patient for the first time. If so, this is always available from the manufacturers (addresses and telephone numbers are given at the end of the entry). Information may also be sought from community nurses and community pharmacists. Where possible manufacturers/suppliers' order code numbers have been shown but prescribers should note that the order numbers shown are not necessarily the full codes for the appliances they wish to order. This is particularly true of urinal systems where additional code numbers are usually necessary to denote variations from the basic design and individual sizes.
3. Prescribers are reminded that incontinence pads (including products not necessarily described as such but using the absorption principle), incontinence garments, skin wipes and occlusive devices such as female vaginal devices and male penile clamps are not prescribable under the Drug Tariff provisions.

All products in Part IXB receive a home delivery fee of 340p.

LEG BAGS

The leg bags listed are suitable for collection of urine from indwelling catheters or incontinence sheaths. They are intended for daytime use although the larger bags may have adequate capacity for overnight use by some patients. The bags may be worn in different positions on the leg and the intended position (eg thigh, knee or calf) will determine the length of the inlet tube. The bags are attached to the leg by means of straps (included with each pack) which are generally either latex or foam with velcro fasteners.

Note: Plastic leg bags identified in the list with an asterisk* may on average be used for 5-7 days. With proper care and cleansing rubber leg bags are re-usable for 4-6 months.

Symbols used in this section

S These leg bags are supplied sterile. This does not affect the guidance given in the note at the beginning.

* Plastics

W Due to the size and weight of these bags when full, this capacity of bag should be prescribed only for wheelchair-bound patients.

All products in this category must be dispensed with a supply of wipes and disposal bags.
