

# Changes to the FP10 NHS prescription form

## Using the FS endorsement - Guidance for dispensing doctors

New prescription forms [have been introduced in England](#) to help eligible patients correctly claim free NHS prescriptions and avoid penalty charges.

[Full guidance and information is available on the NHSBSA website.](#)

The changes include the introduction of a new prescriber endorsement 'FS' for 'free supply of sexual health treatment' to enable prescribers to endorse prescriptions for STIs to indicate to dispensers that the patient should not be charged.

The red separator has also been introduced for dispensing doctors to help us to identify and process scripts endorsed with '**FS**'.

If you have prescriptions for products indicated with the 'FS' prescribing endorsement code:

- place them within this red separator
- put them on the top of your batch submission to us.

The 'FS' prescribing endorsement goes live on the 1st February 2020.

We will provide the new red separator with your usual end of month submission documents for February prescriptions
