About this document

Dashboard name:

Provider NHS England Dentistry Dashboard

This document is designed to sit alongside the Provider NHS England Dentistry Dashboard content to provide some context around the different types of analyses and information presented.

General Notes

Data extracted from FP17s scheduled each month of the reporting year in accordance with year-end methodology.

Each FP17 scheduled between April and June is allocated to a Reporting Year based on the treatment completion date.

Delivery is measured against contracted values and activity as entered on CoMPASS, for each Reporting year, by commissioners.

Current year to date is the latest reporting Time period and the comparators are previous full reporting years.

Dashboard Section – Monthly Reporting

Contract Profile

Note: Re-attendance data Includes all FP17s in the reporting period, regardless of treatment dates, also urgent, orthodontic & foundation dentist FP17s.

Re-attendance intervals are the number of days between the date of acceptance and the most recent date of completion from the two most recent FP17s scheduled in the same or a previous schedule month for FP17s for the same patient identity (surname, initial, gender and date of birth) with a previous course of treatment for that patient identity at the same contract. Expressed as a percentage of total FP17s by Adult/Child and by Patient charge status (Child/Exempt Adult/Non-Exempt Adult) with National and Regional comparators.

Contract Information

Details of contract - Contract details as entered by commissioners on COMPASS

Patient Access

During the last 12 or 24 months. Patients have been identified by using surname, first initial, gender and date of birth. No other identifiers have been used. This is a pragmatic compromise between undercounting patients with common identifiers and over-counting where there are slight differences in recorded details.

Each unique patient ID is counted against the dentist contract against which the most recent claim was recorded in the 12 or 24 month period, with the following exceptions. If the most recent claim is for urgent treatment, orthodontic treatment, free treatment or treatment on referral the ID remains with the previous contract, if there is one within the 12 or 24 month period. If the claim for the previous contract occurred before the 12 or 24 month period the ID is allocated to the most recent contract.

Patient Access	Table – Showing 12 month and 24 month patient counts by adult/child.
