PGD DEVELOPMENT GROUP

Date PGD comes into effect:	31/01/2024
Review date	30/07/2026
Expiry date:	30/01/2027

This PGD has been peer reviewed by the Upper Respiratory Tract Infection (URTI) antimicrobial national PGD Short Life Working Group in accordance with their Terms of Reference. It has been reviewed by The Advisory Committee on Antimicrobial Prescribing, Resistance and Healthcare Associated Infection (APRHAI) to the Department of Health and Social Care (England) in November 2023.

Name	Designation
Dr Diane Ashiru-	Lead Pharmacist, HCAI, Fungal, AMR, AMU & Sepsis Division, UK
Oredope	Health Security Agency
Dr Imran Jawaid	GP and RCGP AMR representative
Dr Jeeves Wijesuriya	GP and Clinical Advisor to NHS England Primary Care Team and Vaccination and Screening Team
Jackie Lamberty	Medicines Governance Consultant Lead Pharmacist, UK Health Security Agency
Jo Jenkins	Lead Pharmacist Patient Group Directions and Medicines
	Mechanisms, Medicines Use and Safety Division, Specialist
	Pharmacy Service
Liz Cross	Advanced Nurse Practitioner QN
Dr Martin Williams	Consultant in Microbiology and Infectious Diseases
Temitope Odetunde	Head of Medicines Management
Nigel Gooding	Consultant Paediatric Pharmacist. Neonatal and Paediatric
	Pharmacist Group (NPPG) representative.
Kieran Reynolds (SLWG	Specialist Pharmacist – Medicines Governance, Medicines Use and
co-ordinator)	Safety Division, Specialist Pharmacy Service
Laura Whitney	NHS England Regional Antimicrobial Stewardship lead for the
	London region
Ms Wendy Smith	Consultant ENT Surgeon
Ghulam Haydar	Senior Policy Lead, Primary Care, Community Services and
	Strategy Directorate, NHS England

Version: 1.1

Characteristics of staff

Qualifications and professional registration	Registered healthcare professional listed in the legislation as able to practice under Patient Group Directions.	
Initial training	 The registered healthcare professional authorised to operate under this PGD must have undertaken appropriate education and training and be competent to undertake clinical assessment of patients ensuring safe provision of the medicines listed in accordance with the specification. To deliver this service, the registered healthcare professional should have evidence of competence in the clinical skills and knowledge covered in the Centre for Pharmacy Postgraduate Education (CPPE) Pharmacy First Service self-assessment framework. Before commencement of the service, the pharmacy contractor must ensure that pharmacists and pharmacy staff providing the service are competent to do so, including in the use of an otoscope (except for contractors entering the NHS England pharmaceutical list under a distance-selling exemption) and be familiar with the clinical pathways, clinical protocol and PGDs. This may involve completion of training. 	
Competency assessment	 Individuals operating under this PGD must be assessed as competent or complete a self-declaration of competence to operate under this PGD (see an example authorisation record sheet in Appendix A). Individuals operating under this PGD are advised to review their competency using the NICE Competency Framework for health professionals using patient group directions 	
Ongoing training and competency	Individuals operating under this PGD are personally responsible for ensuring they remain up to date with the use of all medicines and guidance included in the PGD - if any training needs are identified these should be discussed with the senior individual responsible for authorising individuals to act under the PGD and further training provided as required.	
The decision to supply any medication rests with the individual registered health professional who must abide by the PGD and any associated organisational policies.		

Version: 1.1

Clinical condition or situation to which this PGD applies

Clinical condition or situation to which this	Acute otitis media in children aged 1 year and over and young people (under 18 years of age)
PGD applies	
Criteria for inclusion	 Informed consent Individuals aged 1 year and over and under 18 years of age: Individuals under 2 years of age with bilateral (in both ears) acute otitis media AND Symptoms for > 3 days OR Severe symptoms based on clinical global impression OR Individuals under 18 years of age with acute otitis media and otorrhea (discharge after eardrum perforation) Signs and symptoms of acute otitis media using the appropriate NICE CKS guidance: In older children: earache In younger children: holding, tugging or rubbing of the ear(s) (also non-specific symptoms: fever, crying, poor feeding, restlessness, behavioural changes, cough or rhinorrhoea may also be present) AND (on otoscopic examination): Distinctly red, yellow or cloudy tympanic membrane OR Moderate-severe bulging of the tympanic membrane, with loss of normal landmarks and an air-fluid level behind the tympanic membrane OR Perforation of the tympanic membrane and/or sticky discharge in
	the external auditory canal.
Criteria for exclusion	 Consent refused and documented in the individual's clinical notes Individuals under 1 year of age or 18 years of age and over Pregnancy or suspected pregnancy in individuals under 16 years of age Severely immunosuppressed individuals as defined in Chapter 28a Green book): Individuals with primary or acquired immunodeficiency states due to conditions including: acute and chronic leukaemias, and clinically aggressive lymphomas (including Hodgkin's lymphoma) who are less than 12 months since achieving cure individuals under follow up for a chronic lymphoproliferative disorders including haematological malignancies such as indolent lymphoma, chronic lymphoid leukaemia, myeloma, Waldenstrom's macroglobulinemia and other plasma cell dyscrasias (N.B: this list not exhaustive) immunosuppression due to HIV/AIDS with a current CD4 count of below 200 cells/µl. primary or acquired cellular and combined immune deficiencies – those with lymphopaenia (<1,000 lymphocytes/ul) or with a functional

Version: 1.1

- lymphocyte disorder
- those who have received an allogeneic (cells from a donor) or an autologous (using their own cells) stem cell transplant in the previous 24 months
- those who have received a stem cell transplant more than 24 months ago but have ongoing immunosuppression or graft versus host disease (GVHD)

Individuals on immunosuppressive or immunomodulating therapy including:

- those who are receiving or have received in the past 6 months immunosuppressive chemotherapy or radiotherapy for any indication
- those who are receiving or have received in the previous 6 months immunosuppressive therapy for a solid organ transplant
- those who are receiving or have received in the previous 3 months targeted therapy for autoimmune disease, such as JAK inhibitors or biologic immune modulators including B-cell targeted therapies (including rituximab but for which a 6 month period should be considered immunosuppressive), monoclonal tumor necrosis factor inhibitors (TNFi), T-cell co-stimulation modulators, soluble TNF receptors, interleukin (IL)-6 receptor inhibitors., IL-17 inhibitors, IL 12/23 inhibitors, IL 23 inhibitors (N.B: this list is not exhaustive)

Individuals with chronic immune mediated inflammatory disease who are receiving or have received immunosuppressive therapy

- moderate to high dose corticosteroids (equivalent ≥20mg prednisolone per day) for more than 10 days in the previous month
- long term moderate dose corticosteroids (equivalent to ≥10mg prednisolone per day for more than 4 weeks) in the previous 3 months
- any non-biological oral immune modulating drugs e.g. methotrexate
 >20mg per week (oral and subcutaneous), azathioprine >3.0mg/kg/day;
 6-mercaptopurine >1.5mg/kg/day, mycophenolate >1g/day) in the previous 3 months
- certain combination therapies at individual doses lower than stated above, including those on ≥7.5mg prednisolone per day in combination with other immunosuppressants (other than hydroxychloroquine or sulfasalazine) and those receiving methotrexate (any dose) with leflunomide in the previous 3 months

Individuals who have received a short course of high dose steroids (equivalent >40mg prednisolone per day for more than a week) for any reason in the previous month.

- Immunosuppressed individuals: individuals who are immunosuppressed or are currently taking immunosuppressants (including systemic corticosteroids*) or immune modulators, but who do not meet the definition of severe immunosuppression (see above). [For equivalent doses in children, see Chapter 6 Green Book]
 - * does not include:
 - o replacement corticosteroids for individuals with adrenal insufficiency
 - o corticosteroid inhalers or corticosteroids applied topically (e.g. to the skin, ears, eyes, nasal cavity)
 - o intra-articular, -bursal or -tendon corticosteroid injections.
- Known hypersensitivity to amoxicillin, any penicillin or any of the components within the formulation -see <u>Summary of Product</u> <u>Characteristics.</u> Acceptable sources of allergy information include individual/carer/parent/guardian or National Care Record. OR
- History of severe immediate hypersensitivity reaction (e.g. anaphylaxis)

Version: 1.1

to another beta-lactam antibiotic (e.g. cephalosporin, carbapenem or
monobactam). Acceptable sources of allergy information include
individual/carer/parent/guardian or National Care Record.

- Inability to absorb oral medications and/or inability to swallow oral dosage formulations (i.e. capsules or oral suspension (or oral solution))
- Current long-term use of amoxicillin (or amoxicillin containing preparation) (e.g. for prophylaxis)
- Individuals following a ketogenic diet
- Failed previous antibiotic for this episode of acute otitis media
- Individuals with evidence of, or suspected, foreign body in the ear canal
- Individuals with recurrent infection defined as three or more documented and separate acute otitis media episodes (with an absence of middle ear disease between episodes) in the preceding 6 months, or four or more episodes in the preceding 12 months with at least one episode in the past 6 months
- Individual is at high risk of complications due to pre-existing co-morbidity (e.g. children with significant heart, lung, kidney, liver or neuromuscular disease, severe immunosuppression or immunosuppression, cystic fibrosis and young children who were born prematurely)
- Otitis Media with visible effusion (glue ear)
- Individuals with a temperature over 39°C
- Individuals with suspected <u>meningitis</u> (neck stiffness, photophobia, mottled skin)
- Individuals with suspected <u>mastoiditis</u> (pain, soreness, swelling, tenderness behind the affected ear(s))
- Individuals with suspected <u>intracranial (brain) abscess</u> (severe headache, confusion or irritability, muscle weakness)
- Individuals with suspected <u>sinus thrombosis</u> (headache behind or around the eye(s))
- Individuals with facial nerve paralysis (drooping of the face)
- Individuals with <u>cholesteatoma</u>
- Any individual identified with symptoms of <u>severe/life-threatening</u> infection or systemic sepsis: refer urgently via ambulance.
- Possible cancer:
 - Bloody/blood stained discharge from ear(s)
- Known Chronic Kidney Disease (CKD) stages 4 or 5 (eGFR <30ml/min/1.73m²)
- Less than 3 days before receiving, or within 3 days after receiving, oral typhoid vaccine
- Concurrent use of any interacting medicine as listed in <u>Drug Interactions</u> section of this PGD

Cautions including any relevant action to be taken

- Breastfeeding individuals: amoxicillin can be used in breastfeeding individuals; monitor nursing infant for gastro-intestinal disturbances, oral candida infection, rashes, irritability and drowsiness.
- Caution should be exercised when supplying amoxicillin capsules or oral suspension (or oral solution) to individuals who should avoid the following excipients:
 - Lactose, sucrose, fructose and sorbitol: Individuals with rare hereditary problems of galactosaemia, galactose intolerance, total lactase deficiency, glucose-galactose malabsorption, sucrase-isomaltase deficiency, fructose-1,6-bisphosphatase

	England
	deficiency (also known as hereditary fructose intolerance): check the individual list of excipients available in the SPC before supplying. • Aspartame: Individuals with phenylketonuria (PKU) must not use medicines containing aspartame. Check the individual list of excipients available in the SPC before supplying.
Specific information for suspected infection to be provided	Provide the Treating Your Infection Respiratory Tract Infection (TYI-RTI) patient information leaflet (TARGET RTI leaflet) (TARGET RTI leaflets in other languages are also available). Advise that acute otitis media mainly affects children, can last for around 1
	week and most children will get better within 3 days without antibiotics.
Action to be taken if the individual is	Record reasons for exclusion in the appropriate clinical record
excluded	 Individuals where treatment is not indicated: Provide TARGET RTI leaflet (TARGET RTI leaflets in other languages are also available). Provide self-care advice including: Advise regular doses of paracetamol or ibuprofen (over the counter and where appropriate) for pain, using a dosing schedule appropriate for the age and weight of the child. (For further information see: Mild to moderate pain and NSAIDs-prescribing issues). Explain that evidence suggests decongestants and antihistamines (over the counter) do not help with symptoms. Advise individual/carer/parent/guardian to seek medical advice if symptoms worsen rapidly or significantly or the individual becomes systemically very unwell or if symptoms do not start to improve within 3 days. Refer urgently to a prescriber for further assessment if: Individual is systemically very unwell, but not showing signs or symptoms of sepsis Individual has signs of a more serious illness Individual is at high risk of complications due to pre-existing co-morbidity
	 (e.g. children with significant heart, lung, kidney, liver or neuromuscular disease, severe immunosuppression or immunosuppression, cystic fibrosis and young children who were born prematurely) Possible cancer suspected: Bloody/blood stained discharge from ear(s) Individuals where treatment under this PGD is not indicated/permitted but upper respiratory symptoms are present and require further assessment. Refer urgently to A&E for further assessment if: Signs or symptoms of serious complications (including meningitis, mastoiditis, intracranial (brain) abscess, sinus thrombosis or facial nerve paralysis (drooping of the face)) suspected.

Reference Number: 7b Valid from: 31/01/2024 Review date: 30/07/2026 Expiry date: 30/01/2027 If <u>sepsis</u> is suspected refer the individual urgently to A&E

	For children : see <u>Healthier Together guidance (otitis media (earache))</u> for further information on appropriate signposting and parent information sheets.
Action to be taken if the individual/carer/parent/ guardian declines treatment	 Document advice given Provide safety netting advice and advise individual/carer/parent/guardian of alternative treatment available using <u>TARGET RTI leaflet</u> (<u>TARGET RTI leaflets in other languages</u> are also available). Refer to a prescriber if appropriate
Arrangements for referral for medical advice	Refer to the appropriate medical practitioner in the care pathway

Description of treatment

Name, strength &	Amoxicillin 250mg capsules
formulation of drug	Amoxicillin 500mg capsules
	Amoxicillin 125mg/5mL oral suspension (or oral solution) x 100mL
	Amoxicillin 125mg/5mL sugar free oral suspension (or oral solution) x 100mL
	Amoxicillin 250mg/5mL oral suspension (or oral solution) x 100mL
	Amoxicillin 250mg/5mL sugar free oral suspension (or oral solution) x
	100mL
	Amoxicillin 500mg/5mL sugar free oral suspension (or oral solution) x
	100mL
Legal category	POM
	Orally, taken with food or water. Capsules should be swallowed whole.
Route / method of administration	
Off-label use	Temperature variations
	Medicines should be stored according to the conditions detailed in the
	Storage section below. However, in the event of an inadvertent or
	unavoidable deviation of these conditions the pharmacist must ensure
	the medicine remains pharmaceutically stable and appropriate for use if
	it is to be issued.
	Where medicines have been assessed by a pharmacist in accordance
	with national or specific product recommendations/manufacturer advice
	as appropriate for continued use this would constitute off-label
	administration under this PGD.
	The responsibility for the decision to release the affected medicines for
	use lies with the pharmacist.
	Manipulating solid dosage forms
	In the event of an individual being unable to swallow solid oral dosage
	formulations, and alternate liquid formulations not being readily
	available provide advice on how to give doses by opening
	capsules. Use in this way may be outside the product licence and is
	thus off-label.
	Where a drug is recommended off-label consider, as part of the consent
	process, informing the individual/carer/parent/guardian that the drug is
Varaion: 1.1	process, anothing the marriada, our of pareing guardian that the drug is

Version: 1.1

Treatment should be started immediately and 5 days of treatment completed In line with the Pharmacy First service specification the best value product to meet the clinical need should be supplied from those listed within this PGD. Children 1–4 years: Appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 1 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 125mg/5mL oral suspension (or oral solution) Children 5-17 years: Appropriately labelled pack of 15 x 500mg capsules OR appropriately labelled pack of 30 x 250mg capsules OR appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x		
Treatment should be started immediately and 5 days of treatment completed In line with the Pharmacy First service specification the best value product to meet the clinical need should be supplied from those listed within this PGD. Children 1–4 years: Appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 1 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 125mg/5mL oral suspension (or oral solution) Children 5-17 years: Appropriately labelled pack of 15 x 500mg capsules OR appropriately labelled pack of 30 x 250mg capsules OR appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x		
Treatment should be started immediately and 5 days of treatment completed In line with the Pharmacy First service specification the best value product to meet the clinical need should be supplied from those listed within this PGD. Children 1–4 years: Appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 1 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 125mg/5mL oral suspension (or oral solution) Children 5-17 years: Appropriately labelled pack of 15 x 500mg capsules OR appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x		
Treatment should be started immediately and 5 days of treatment completed In line with the Pharmacy First service specification the best value product to meet the clinical need should be supplied from those listed within this PGD. Children 1–4 years: Appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 1 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 125mg/5mL oral suspension (or oral solution) Children 5-17 years: Appropriately labelled pack of 15 x 500mg capsules OR appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x		
Treatment should be started immediately and 5 days of treatment completed In line with the Pharmacy First service specification the best value product to meet the clinical need should be supplied from those listed within this PGD. Children 1–4 years: Appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 1 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 125mg/5mL oral suspension (or oral solution) Children 5-17 years: Appropriately labelled pack of 15 x 500mg capsules OR appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x	500mg three times a day (every 8 hours)	
Treatment should be started immediately and 5 days of treatment completed In line with the Pharmacy First service specification the best value product to meet the clinical need should be supplied from those listed within this PGD. Children 1–4 years: Appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 1 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 125mg/5mL oral suspension (or oral solution) Children 5-17 years: Appropriately labelled pack of 15 x 500mg capsules OR appropriately labelled pack of 1 x 100mL x 500mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 2 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x 100mL x 250mg/5mL oral suspension (or oral solution) OR appropriately labelled pack of 3 x		
Treatment should be started immediately and 5 days of treatment completed In line with the Pharmacy First service specification the best value product to meet the clinical need should be supplied from those listed within this PGD. Drug interactions	Where it is known an individual is concurrently taking one of the
	following medicines, amoxicillin must not be supplied under this PGD
	and the individual referred to a prescriber:
	·
	Allopurinol
	Methotrexate
	Probenecid
	Typhoid vaccine (oral): see <u>Criteria for exclusion</u>
	See BNF for all drugs that can interact with amoxicillin.
	A detailed list of drug interactions is available in the SPC, which is available from the electronic Medicines Compendium website: www.medicines.org.uk
Identification &	A detailed list of adverse reactions is available in the SPC, which is
management of	available from the electronic Medicines Compendium website:
adverse reactions	www.medicines.org.uk and BNF www.bnf.org
adverse reactions	www.modianico.org.an
	The following side effects are listed in the product SPC or BNF as common or very common with amoxicillin (but may not reflect all reported side effects):
	Diarrhoea
	Nausea
	Skin rash
	Hypersensitivity
	Vomiting
	 Thrombocytopenia (low levels of platelets in the blood)
	Severe adverse reactions are rare, but <u>anaphylaxis</u> (delayed or immediate) has been reported and requires immediate medical treatment.
	In the event of a severe adverse reaction, the individual must be
	In the event of a severe adverse reaction, the individual must be advised to stop treatment immediately and seek urgent medical advice.
Management of and reporting procedure for adverse reactions	 Healthcare professionals and individuals/carers/parents/guardians are encouraged to report suspected adverse reactions to the Medicines and Healthcare products Regulatory Agency (MHRA) using the Yellow Card reporting scheme on: https://yellowcard.mhra.gov.uk
	Record all adverse drug reactions (ADRs) in the individual's clinical
	, ,
	record.
	Report and document in accordance with organisation incident
	policy.
	It is considered good practice to notify the individual's GP in the
	event of an adverse reaction.
Written or other	Provide marketing authorisation holder's information leaflet (PIL)
information to be given	provided with the product.
to	Provide the <u>TARGET RTI leaflet</u> (<u>TARGET RTI leaflets in other</u>
individual/carer/parent/	languages are also available).
guardian	Utilise TARGET antibiotic checklist for counselling

	Erigiana
	individuals/carers/parents/guardians.Give any additional information in accordance with the service specification.
Individual advice / follow up treatment	 Explain the dose, frequency and method of administration. The individual/carer/parent/guardian should be advised to read the PIL. Store reconstituted oral suspension (or oral solution) in accordance with the conditions as outlined in the individual product SPC (storage recommendations may vary between different reconstituted oral suspension (or oral solution) products). Without treatment, symptoms should start to improve within 3 days. Symptoms should start to improve within 72 hours of taking amoxicillin – advise individual/carer/parent/guardian to seek medical advice if symptoms do not improve or worsen within this time. Advise individual/carer/parent/guardian to seek immediate medical attention (by calling 999 or going to A&E) if the individual develops signs or symptoms of sepsis. Inform individual/carer/parent/guardian of possible side effects and their management, including advice to take amoxicillin with food to reduce the likelihood of nausea. Advise individual/carer/parent/guardian to take/give the medication at regular intervals with food or water and to finish the course. If the individual is affected by dizziness or drowsiness advise them not to drive or operate machinery. The individual/carer/parent/guardian should be advised to seek medical advice in the event of an adverse reaction or if any other new symptoms develop. If a dose is missed advise to refer to PIL supplied with the product Advise individual/carer/parent/guardian to return any unused medicines to a pharmacy for disposal: do not dispose of medicines in the bin, down the sink or toilet.
Records	Appropriate records must include the following:
	 That valid informed consent has been given Individual's name, address and date of birth Name of GP individual is registered with or record where an individual is not registered with a GP Name and registration number of registered healthcare professional operating under this PGD Specify how the individual has/has not met the criteria of the PGD Relevant past and present medical history and medication history Any known allergies and nature of reaction(s) Name/dose/form/quantity of medicine supplied Date and time of supply Documentation of cautions as appropriate Advice given, including advice given if individual excluded or declines treatment Details of any adverse drug reactions and actions taken Advice given about the medication including side effects, benefits, and when and what to do if any concerns.

- Any follow up and/or referral arrangements made.
- Any supply outside the terms of the product marketing authorisation
- The supply must be entered in the Patient Medication Record (PMR)
- That supply was made under a PGD
- Any safety incidents, such as medication errors, near misses and suspected adverse events
- Any additional requirements in accordance with the service specification:
 - The pharmacy contractor will ensure that a notification of the provision of the service is sent to the patient's general practice on the day of provision or on the following working day. Where possible, this should be sent as a structured message in real-time via the NHS assured Pharmacy First IT system. In the absence of an automated digital solution or if there is a temporary problem with the system, this should be sent via NHSmail or hard copy.
 - Where an action is required by the General Practice team (such as booking the patient in for a follow up or appointment) an action message or alternative form of an URGENT ACTION communication (rather than the standard post event message) must be sent to the practice.
- All records should be kept in line with <u>national guidance</u>. This includes individual data, master copies of the PGD and lists of authorised practitioners.

Records must be signed and dated (or a password controlled erecords).

All records must be clear, legible and contemporaneous.

A record of all individuals receiving treatment under this PGD must also be kept for audit purposes in accordance with the service specification.

Appendix A – example registered health professional authorisation sheet (example – local versions/electronic systems may be used)

PGD Name/Version Valid from: Expiry:

Before signing this PGD, check that the document has had the necessary authorisations. Without these, this PGD is not lawfully valid.

Registered health professional

By signing this patient group direction you are indicating that you agree to its contents and that you will work within it.

Patient group directions do not remove inherent professional obligations or accountability.

It is the responsibility of each professional to practise only within the bounds of their own competence and professional code of conduct.

I confirm that I have read and understood the content of this Patient Group Direction and that I am willing and competent to work to it within my professional code of conduct. Name Designation Signature Date

Authorising manager

I confirm that the registered health professionals named above have declared themselves suitably trained and competent to work under this PGD. I give authorisation on behalf of insert name of organisation for the above named health care professionals who have signed the PGD to work under it.

Name	Designation	Signature	Date

Version: 1.1

Note to authorising manager

Score through unused rows in the list of registered health professionals to prevent additions post managerial authorisation.

This authorisation sheet should be retained to serve as a record of those registered health professionals authorised to work under this PGD.

Add details on how this information is to be retained according to organisation PGD policy.
